Informed Consent Document

Please read this entire document prior to signing it. It is important that you understand the information contained in this document. Please ask questions before you sign if there is anything that is unclear.

Nature of Chiropractic Care. The primary treatment used by Doctors of Chiropractic is spinal manipulative therapy. I will use that procedure to treat you. I may use my hands or a mechanical instrument upon your body in such a way to move your joints. That may cause an audible noise, and you may feel a sense of movement.

Analysis, Examination, Treatment. As part of the analysis, examination, and treatment, you are consenting to the following procedures, but not limited to:

Spinal manipulative therapy	Range of motion testing	Therapeutic ultrasound
Palpation	Orthopedic testing	Hot/cold therapy
Vital signs	Basic neurological testing	Electric muscle stimulation
	Radiographic studies	

Risk Inherent with Chiropractic Care. As with any healthcare procedure, there are certain complications which may arise during chiropractic manipulation and therapy. The Doctor will make every reasonable effort during the examination to screen for contraindications of care. These complications include, but are not limited to: muscle strain, burns, fractures, disc injuries, dislocations, cervical myelopathy, and costovertebral stains and separations. Some patients will feel some stiffness and soreness following the first few days of treatment.

Other Available Treatment Options. Other treatment options for your condition may include self-administered over-the-counter analgesics, rest, medical care, prescription drugs, hospitalization, and surgery. If you chose to use one of the above noted "other treatment" options, you should be aware that there are risks and benefits of such options and you may wish to discuss these with your primary medical physicians.

Risk of Remaining Untreated. Remaining untreated may allow the formation of adhesions and reduce mobility which may set up a pain reaction further reducing mobility. Over time, this process may complicate treatment making it more difficult and less effective the longer it is postponed.

I have read the above explanation of the chiropractic adjustment and related treatment. I have discussed it with my care provider(s) and have had my questions answered to my satisfaction. By signing below, I state that I have weighed the risks involved in undergoing treatment and have decided that it is in my best interest to undergo the treatment recommended. Having been informed of the risks, I hereby give my consent to that treatment.
